The election is not responsive because it does not elect a single disclosed species. A single disclosed species means that a detailed recitation of the elected embodiment is required. For example (A) a heating or cooling device and specifically what is the device? (B) is the detector integral with control unit or remote? (C) is the detector a motion detector, infrared, vibration sensor? (D) is the device turned off when a human is absent or is a different set-point specified? (E) is there a time delay when a person is not present before action is taken? (F) is there a wireless connection between the detector and the device or are there wires.

The applicant is also required to provide a drawing which shows all of the features set forth in the elected claims.

The applicant is cautioned that the Examiner will not accept the applicant's definition in page 3 line 15 of a – cooling device as a refrigerant cooling unit having a compartment for storing products – This will not be allowed because it goes in direct contradiction to the generally accepted art definition. The word –refrigerator- is acceptable.

Any inquiry concerning this communication should be directed to William Wayner at telephone number 703-308-1041.
